PRESS RELEASE **For Immediate Release**

December 17, 2024 Port Angeles, Washington – the Clallam County Department of Health and Human Services, Environmental Health Division announces updated shellfish harvest information for beaches in Clallam County.

Effective immediately, the Washington State Department of Health updated harvest closures of the following beaches for the recreational harvest of the species of shellfish listed:

In Clallam County, the Strait of Juan de Fuca from the Lyre River / Low Point area east to the Jefferson County line is closed only to recreational harvest of Butter and Varnish clams.

The following beaches in Clallam County are listed with the closure status in effect:

Date	Beaches	Status
12/12/2024	Strait of Juan de Fuca from Lyre River / Low Point east to the Jefferson County line.	Closed to Butter and Varnish clams only
	Discovery Bay	Closed to Butter and Varnish clams only
	Sequim Bay	Closed to Butter and Varnish clams only
	Strait of Juan de Fuca from Lyre River / Low point west	Closed to all species
Ongoing	Seasonal closure of ocean beaches	Closed to all species

Closed to all species means clams (including geoduck), oysters, mussels and other invertebrates such as the moon snail. All areas are closed for the sport harvest of scallops. These closures do not apply to shrimp. Crabmeat is not known to contain biotoxins, but the guts can contain unsafe levels. To be safe, clean crab thoroughly and discard the guts (butter).

It is important to know the difference between butter clams and other species of clams. Butter clams have the ability to retain toxins for a very long time - up to a year or more. Areas may be closed for the sport harvest of butter clams when all other species are safe and open.

For more information about this closure, call the Marine Biotoxin Hotline at 1.800.562.5632, or visit the Department of Health's Marine Biotoxin Website at www.doh.wa.gov/shellfishsafety.htm

For additional information call Audrey Coyne with the Washington State Department of Health, Office of Shellfish and Water Protection at 360.236.3354.

These health-related closures are in addition to closures regulated by the Washington State Department of Fish and Wildlife. Fish and Wildlife closures can be found on their website:

http://wdfw.wa.gov/fishing/shellfish/beaches/beach_names.php

Their emergency regulation hotline is 1.866.880.5431.
