

ADDRESS POST AND PLACARD SHARED DRIVEWAY SUPPLEMENT

Guidelines: This supplement should be used in conjunction with “Address Post and Placard Installation Guide”

- Where the shared driveway meets the road, one post should be installed with a placard for each of the addresses on the shared driveway in numerical order (lowest on top).
- When an individual driveway splits from the shared driveway, a post and placard should be installed with the individual 911 address placard for that driveway.
- If the shared driveway splits into two directions, one post should be installed with placards pointing to the individual driveways.
