PLAN REVIEW APPLICATION FOR MOBILE FOOD ESTABLISHMENTS

Mobile food units can be trucks, trailers, or carts that sample, sell, or serve food. Use the Mobile Food Establishment (MFE) Guidance Document and the Washington State Retail Food Code, WAC 246-215 to complete this application.

APPLICATION

- **INCOMPLETE PLAN REVIEW APPLICATIONS WILL BE RETURNED.**
- Provide all sections of application at least **30 DAYS BEFORE your proposed opening date.**
- Plan review fees are due and payable at the time the application is submitted, applications missing required documentation will be returned.
- Plan review fees are charged according to the type of menu proposed and are listed below.
- Once your plans and application have been submitted, any modifications must be made in writing and are subject to review and approval by an Environmental Health Specialist.
- Technical Assistance fees may apply if assistance is needed before application submission.
 - **\$882.00 Complex Menu** Any food service establishment which serves and/or prepares Time/Temperature Control for Safety (TCS) Foods at least 6 hours in advance of serving or serves (TCS) which require 2 or more of the following preparation steps: a) cook (TCS); b) cool (TCS); c) reheat (TCS); d) hot hold (TCS) for 2 or more hours.
 - **\$882.00 Non-Complex Menu** Any food service establishment which serves and/or prepares Time/Temperature Control for Safety Foods but does not meet the definition of a Complex Menu operation. Establishments are limited to food that can be served immediately after preparation, i.e. espresso, bakery, deli, etc.
 - **\$214.00 Change of Ownership** with **no other** changes to the physical facilities or the menu. This fee is 50% of your plan review fee for Complex or Non-complex menus, respectively.
 - **\$214.00 Change in Food Service** for changes in menu, increased seating or remodeling of food establishment. All significant changes in service must be approved by an Environmental Health Specialist.
 - **\$107.00 per hour Technical Assistance Fee** Additional inspections and services beyond those covered by The Plan Review fee or those that require services as a result of non-compliance of County and State food safety codes. For example, if an Environmental Health Specialist must make recurring visits to a food establishment whose employees do not have current food handler cards, that establishment will be billed for **each** resulting follow-up inspection.

Plan Reviews are processed in the order in which they are received. Plan for a 30 day turn around.

MOBILE UNIT PLAN REVIEW RECIPROCITY CHECKLIST

Food Service Establishment Form

Submittal Date	New Customer ID#	Memo Number

Mobile unit name: _____

This optional checklist is for mobile units currently holding an annual operating permit in a county other than Clallam and wish to obtain a Food Service Establishment Permit in Clallam County; it should be used to prepare a complete Mobile Unit Plan Review Reciprocity Packet. Check off items as you complete them. Make a copy of your plan review packet for your records. If you have been approved to use a commissary in a different county, you must return to that commissary each day. If you would like to use a commissary kitchen in Clallam, you will need to go through plan review with our office. **If you do not hold an annual mobile operating permit in another county, skip pages 2-3.**

✓	#	ITEM	DESCRIPTION	Office Use Only
	1	Application	Submit completed Food Service Establishment Permit Application and applicable Mobile Unit Permit fee; see the Environmental Health Fee Schedule for current fees.	
	2	Approved plan review documents	Submit the following approved plan review documents from the health department who currently permits your mobile unit (WAC 246-215-09115). <ul style="list-style-type: none"> <input type="checkbox"/> Menu and food preparation steps <input type="checkbox"/> Mobile unit floor plan <input type="checkbox"/> Mobile unit equipment list <input type="checkbox"/> Mobile unit finish schedule <input type="checkbox"/> Source of water and on-board plumbing specifications <input type="checkbox"/> Wastewater disposal site <input type="checkbox"/> Employee restroom location <input type="checkbox"/> Operating procedures <input type="checkbox"/> Cleaning schedule <input type="checkbox"/> Commissary Kitchen Agreement <input type="checkbox"/> Valid mobile unit permit in the county that issued the plan review approval 	
	3	Location plan	Submit a description of how your customers will find your location. If social media sites are used, include the social media site address.	
	4	Commissary Kitchen	If applicable, submit completed a Commissary Kitchen Agreement if you are going to use a commissary kitchen in Kitsap County. You may need to go through plan review with our office if you plan to use a kitchen other than the one included in your original, approved plan review.	
	5	Sale Site Agreement or route information	Submit a completed Sales Site Agreement for each stop over one hour. Submit a route if you intend to operate on a specific route.	
	6	Photo of mobile unit	Submit a picture of the mobile unit with the name clearly visible.	
ADDITIONAL INFORMATION FOR MOBILE UNITS WITH A COMMISSARY KITCHEN OUTSIDE OF KITSAP				
	7	Current permit(s)	Submit a copy of the valid permit for the	

			<input type="checkbox"/> Mobile unit (temporary event permits are not accepted) <input type="checkbox"/> Commissary kitchen	
	9	Inspection report(s)	Submit a copy of the most recent inspection report from the original permitting agency that demonstrates compliance with food safety standards for the <input type="checkbox"/> Mobile unit <input type="checkbox"/> Commissary kitchen (if available)	

Signature _____ Title _____ Date _____

CERTIFICATION AND ACKNOWLEDGMENT

By signing above, I certify that the information provided is true and accurate to the best of my knowledge. I understand that:

- ✓ I cannot start operating in Clallam County until I receive an Approved Health Officer Decision for my Food Service Establishment Permit.
- ✓ I have been approved to operate by all applicable city, county, and state agencies that are applicable to my business.

HEALTH DISTRICT REVIEW

Reviewed and accepted by:

Environmental Health Specialist

Date

Glossary of Terms

“Cart” means a mobile food unit that can be pushed by a single person to move between locations.

“Commissary” is an approved, licensed food establishment where food is stored, prepared, portioned, or packaged to be served.

“Food Code” refers to [Chapter 246-215 Washington Administrative Code](#), which is the set of regulations governing retail food establishments.

“Health District” means the Kitsap Public Health District.

“Limited food service” means a food establishment with a limited menu in a building without permanent plumbing.

“Menu” means the types of food that will be served and how they are prepared.

“Mobile food unit or mobile unit” means a food service that can be easily moved from one location to another, such as a food cart, trailer, or truck. “Pop-up setups”, such as those at a farmers market, are not allowed.

“Occupied mobile food unit” means a mobile food unit where the workers will be inside of the unit, such as an enclosed food truck or trailer.

“Plan review” is the careful review of the proposed mobile food unit design, equipment, and menu by the Health District to ensure food items will be safely stored, prepared, and served before the operating permit is granted. Reviewers will ensure the mobile food unit is designed for food safety and that there is access to an approved commissary and bathroom. This packet will help you prepare everything you need to submit for a successful plan review.

Plan review is also required when changes are made to an existing mobile food unit, such as changes in ownership, commissary location, menu, equipment, or physical design.

“Servicing area” is the base of operation to which the unit returns to at least once per day of operation for activities such as cleaning, discharging of liquid or solid waste, refilling freshwater tanks, boarding or storing dry food supplies, equipment, and paper products. The servicing area may be the same location as the commissary kitchen.

“Time and temperature control (TCS) food” is food that needs time and/or temperature control for food safety, such as dairy products; meat; eggs; fish; shellfish; cooked rice, beans, potatoes, and pasta, tofu; batters; sliced melons; cut tomatoes and leafy greens; and untreated garlic- or herbs-in-oil mixtures. The foods listed are examples and the list is not comprehensive.

Plan Review Procedure for Mobile Units

1. Within 30 days of your intended opening, submit a Mobile Unit Plan Review Packet and appropriate fee to the Food Program. The applicable fee for the Plan Review Application depends upon the proposed activities, menu, and food handling processes of the establishment. Fees are non-refundable.

The floorplan must exactly match the floorplan submitted to other agencies, if applicable. Packets may be submitted over the counter at our office or mailed. Incomplete packets will not be accepted. Packets expire one year after date of submission.

- New establishments
 - Low Risk Establishment category: Includes shelf-stable foods; cold holding of TCS foods; or heating then immediately serving fully cooked, commercially prepared, TCS foods. Examples are espresso drinks or hot dogs.
 - High Risk Establishment category: Includes produce washing; extensive food handling; or cooking, reheating, hot holding, or cooling of TCS foods. Examples are full-service menus, sandwiches, or salads.
- Change of ownership only applies if:
 - There are no changes to the menu or equipment in the facility.
 - The operation of the business is continuous from the old owner to the new owner. If the business closes for any amount of time, full plan review is required; see the “new establishments” section above for fee information.
 - It has been less than 30 days after the effective ownership change date. Changes of ownership in effect for 30 days or more will submit full plan review fees; see the “new establishments” section above for fee information.

*At the time of a change of ownership, the establishment will need to be upgraded to meet the current facility requirements of the Food Code. Your inspector will let you know which upgrades need to be made during the first routine inspection. The first routine inspection will occur within 30 days of the change of ownership effective date.

- Existing mobile units:

Application type	Fee schedule description
Remodel	Determined by inspector.
Equipment change only	Equipment Review
Menu change only	Change in Menu

3. New mobile units permit: If you are applying to permit an already-constructed mobile unit, an inspector will contact you to schedule a Plan Review Site Inspection. If the unit has not been constructed yet, your inspector may contact you with questions or may be able to issue a Health Officer Decision with the information provided (see step 4).

Existing mobile units: A Plan Review Site Inspection may occur, and its necessity is determined by the inspector on a case-by-case basis. An inspector will contact you to explain the next steps.

4. Once the Plan Review Site Inspection and in-office review is complete, the inspector will issue a Health Officer Decision page. The application will be approved, pending, or denied. If the inspector needs more information from you to complete the review, the decision may be delayed.
 - a. Approved: The application is approved as submitted. Any changes made to the floorplan, menu, or services offered after the approval is issued requires Health District review and approval; submit changes via the

[Food Service Establishment Plan Review Revision Request Form](#). Revisions may result in postponement of the application review.

- b. Pending: The submitted application cannot be approved as-is. The conditions that need to be addressed to obtain approval are listed on the Health Officer Decision, and may require that an updated floorplan or menu be submitted; submit changes via the [Food Service Establishment Plan Review Revision Request Form](#). Revisions may result in postponement of the application review. Keep in mind that the floorplan submitted to the Health District must exactly match the floorplan submitted to other agencies, so you must submit a copy of the updated floorplan to them as well.
 - c. Denied: The application is not approved. The reason(s) will be listed on the Health Officer Decision.
5. When construction and the Health Officer Decision requirements are completed and the permit application has been submitted, contact your inspector to schedule the pre-operational inspection. Notice of at least five business days prior to intended opening is required for scheduling the pre-operational inspection. Cold and hot holding equipment will be checked for compliance at this time. If there is no food in the equipment, containers of water are required to be placed inside each unit so that the inspector can obtain a temperature. If a unit has a top and bottom or side by side component, a container of water should be placed in each section.

Department of Labor & Industries (L & I) may require your mobile unit to be inspected and approved. L & I approval is required before the Health District will conduct the pre-opening inspection. Any changes made to the unit after receiving approval from L & I may require you to go through review again. Check with L & I if this is the case with your unit.

If a pre-operational inspection is attempted and the requirements listed in the Health Officer Decision were not completed, the inspection will be postponed and a reinspection fee will be assessed (see [Environmental Health Fee Schedule](#) for current rate).

Mobile Unit Food Service Establishment Permit- General Requirements

1. If you do not have your own licensed, commercial kitchen, you have the option to either use a commissary kitchen (recommended) or operate as a fully self-contained mobile unit.
 - a. Using a commissary kitchen: The Health District licenses commissary kitchens and food establishments in Clallam County; either may be used for your commissary kitchen.. A Commissary Kitchen Agreement (see page 23) must be submitted with your application. Be aware that your selected kitchen may not accommodate your business model and its suitability will be determined during the review process. A commissary kitchen is an approved food establishment where food is stored, prepared, portioned, or packaged.
 - b. Proposing to operate as a fully self-contained mobile unit: You will need to submit a written plan of operation with your application (see page 26). CCEH will determine whether self-contained mobile food units can operate without a commissary kitchen.
2. Your mobile unit must be marked with your business name in an obvious place for customers to see.
3. During transport, hot and cold holding equipment must run off the engine, propane, or generator and keep cold food at or below 41°F and hot food at or above 135°F.
4. Your mobile unit must have a garbage container for waste made during operation.
5. Your mobile unit must be mobile (on wheels that are always functional and appropriate for the type of unit). CCEH must pre-approve servicing locations and location where the unit will be stored overnight.

6. You must keep a copy of your Food Establishment Permit in your mobile unit.
7. You must have adequate mechanical refrigeration for food that must stay cold for food safety. Refrigerators must be pre-chilled before putting food in them. Food that must stay cold for safety must stay at or below 41°F. Coolers packed with ice may be used as a cold holding method for non-TCS foods.
8. You must have commercial-grade, mechanical equipment powered by electricity, propane, or generator to keep hot food at or above 135°F. Equipment must be pre-heated before putting food in it. "Sterno"-type fuel is not allowed.
9. Foods prepared on the unit that require temperature control for safety must be served on the same day. Unused food prepared on the unit that require temperature control for safety must be discarded at the end of each day.
10. You cannot cool foods that require temperature control for safety on your unit.
11. Food being reheated for hot holding must reach 165°F within one hour and can only be reheated once.
12. Cooking of raw meats is restricted to thin foods, such as hamburger patties. Cooking of raw meats greater than one inch in thickness is not allowed. Cooking of raw meats greater than one inch in thickness must be done in a commissary kitchen.
13. Serve condiments in single-serve packages or squeeze bottles. If a condiment is not available in single-serve packages and cannot be served in a squeeze bottle, it may be served in bulk. Condiments served in bulk cannot require refrigeration and must be protected by a food guards, display cases, or other effective means.
14. You must protect food from customer contamination. Sneeze-guards, dome lids, or other approved shields must protect work areas, food, and single-serve items. Vertical sneeze-guards must be 60-inches or taller (measured from the ground).
15. Your mobile unit must have at least one handwash sink permanently installed in it unless you are only serving pre-packaged food. The basin must be large enough to wash both hands simultaneously without touching the sides or bottom of the sink. Splashguards may be required to prevent contamination of food, clean equipment and utensils, and single-service and single-use articles. The hand sink station must always be stocked with soap and paper towels.
16. The handwash sink(s) must provide easy access for all employees who are preparing or dispensing food and beverages, conducting warewashing, or using the restroom. It cannot be located underneath a counter. If it is installed on a slide-out drawer, it must be locked open while food is handled or served.
17. Your mobile unit must have a hot water heater that provides water at 100°F or above to all sinks.
18. Your mobile unit must have a mechanical pump that pressurizes hot and cold water to 15 psi. The pump must turn on and off automatically. You cannot use a pump switch each time water is used.
19. Your mobile unit's freshwater tanks and all piping and tubing must be made of food-grade materials. The potable water tank must be permanently installed on the mobile unit. The water inlet must be protected from contamination and be designed to prevent attachment of a non-potable service connection.
20. You must use a food-grade quality hose to fill freshwater tanks. The hose must be provided with an approved backflow preventer. Garden hoses are not allowed.
21. Freshwater tanks must hold at least five gallons of water dedicated to handwashing. Depending on your plan of operation, you may need a larger freshwater tank for cleaning utensils, preparing food, sanitizing, warewashing, or cleaning; see "additional requirements" in the next sections.
22. You must be able to easily empty the wastewater tank. The wastewater tank and its connections cannot leak. The wastewater tank must be permanently installed on the mobile unit and sized to be at least 15% larger than the freshwater tank. Wastewater must be removed in such a manner that a public health hazard or nuisance is not

created. Wastewater must be discharged into a sanitary sewage system; a Wastewater Disposal Agreement may be required (see page 28). Dumping wastewater onto the ground, into waterways, or into storm drains is not allowed.

23. We may require you to limit the food preparation steps or amount of food prepared, prohibit some menu items, or limit your operation schedule when facilities or equipment are inadequate to protect public health.
24. All light fixtures must have light covers, sleeves and endcaps, or shatterproof light bulbs. A light intensity of at least 50 foot-candles must be used inside the unit.
25. All surfaces of your unit must be smooth, non-absorbent, durable, non-toxic, non-corrosive, and easily cleanable. Bare wood surfaces are not allowed. Equipment and utensils must be National Sanitation Foundation-approved or equivalent.
26. If you will be washing produce on the unit, a dedicated food preparation sink is required. The sink must be indirectly plumbed with a minimum one-inch air gap in the waste line as illustrated in the diagram to the right. The flood level rim of the receiving pipe must be at least twice the diameter of the inlet pipe.
27. You must provide a cleaning schedule.
28. Water must be from an approved public water system.
29. All food must either be prepared in the unit, prepared in a commissary kitchen, or obtained prepared from an approved source. If you plan to prepare food off the unit, a commissary kitchen is required.
30. Food must be stored on the unit, in a commissary kitchen, or in a Washington State Department of Agriculture-licensed warehouse. Storage of food at a residence is prohibited.
31. Describe your servicing area in the plan of operation. Service areas may include, but are not limited to, where you store the unit when it is not in use, clean the unit, obtain freshwater, and dispose of wastewater. A servicing area may be a commissary kitchen.
32. You must have a large enough supply of clean utensils to last during all hours of operation or you must properly clean and sanitize them at least every four hours. Only single-service utensils may be offered to customers for use and they must be stored and dispensed in a sanitary manner.

Occupied Mobile Unit (Operator is Inside)—Additional Requirements

1. Your occupied mobile unit must be inspected and approved by Department of Labor and Industries before we will complete a pre-opening inspection.
2. Your mobile unit's freshwater tank must hold at least 35 gallons.
3. Your mobile unit's wastewater tank must hold at least 15% more than its freshwater tank (minimum 42 gallons).
4. Your mobile unit must have a three-compartment sink with drainboards attached on both ends. The sink compartments must be large enough to submerge and wash all equipment used on the mobile unit. Drainboards must be the size of the sink compartment.
5. Your mobile unit's hot water heater must be large enough to completely fill two compartments of the 3-compartment sink with hot water (100°F or above) without the handwash water temperature dropping below 100°F.

Unoccupied Mobile Unit (Operator is Outside)—Additional Requirements

1. Your mobile unit's freshwater tank must hold at least 5 gallons. You cannot use a bucket.
2. Your mobile unit's wastewater tank must hold at least 15% more than its freshwater tank (minimum 6 gallons). You cannot use a bucket.
3. You cannot use a juice extractor because they are difficult to clean while operating.

4. You cannot cook or sell raw meat or seafood, unless you are selling items in unopened packages.

Mobile Cart (One Person Can Push Unit Between Locations)—Additional Requirements

1. Your mobile unit's freshwater tank must hold at least 5 gallons. You cannot use a bucket.
2. Your mobile unit's wastewater tank must hold at least 15% more than its freshwater tank (minimum 6 gallons). You cannot use a bucket.
3. You cannot use a juice extractor because they are difficult to clean while operating.
4. You cannot cook or sell raw meat or seafood, unless you are selling items in unopened packages.
5. You must wash and sanitize reusable utensils (e.g., tongs, spoons) in your commissary kitchen. You must store extra clean and sanitized utensils in your mobile unit. You must have a sanitary container for clean utensils and a separate container for soiled utensils.
6. Your mobile unit cannot be bigger than 3 feet by 6 feet with two wing extensions no longer than 18 inches. Local agencies may require your mobile unit to be smaller.

Selling Only Pre-Packaged, TCS Foods—Additional Requirements

1. Your mobile unit does not have to have a handwash sink.
2. You may not offer samples.

Other Agencies' Requirements

Contact other state and local agencies for additional requirements. For example:

- Building departments may require you to have a land use permit for your sale site(s).
- Fire departments may require you to have a permit to use liquid propane, charcoal, wood, or oil frying equipment.
- Local government may require your cooking equipment to have a ventilation hood or tight-fitting cover.
- State or local government may require you to have business license(s).
- Department of Labor and Industries (L & I) may require your mobile unit to be inspected and approved. NOTE: Proof of L & I approval is required before the CCEH will conduct the mobile unit pre-opening inspection.
- Department of Motor Vehicles (DMV) may require your mobile unit to be registered.

MOBILE UNIT EQUIPMENT LIST

List all equipment, including make and model numbers. Examples of equipment include, but are not limited to, refrigerators, sinks, stoves, ovens, steam tables, blenders, ice machines, and countertop appliances. If make and model number cannot be found, a photo of the equipment must be submitted. The wattage values are used to make sure your mobile unit has an adequate power supply.

Requirements

- Photos of equipment must be included if make and model number cannot be found.
- Use ID numbers from the Mobile Unit Floorplan Checklist for cross-referencing.

MOBILE UNIT FINISH SCHEDULE

Provide the materials used for all floors, walls, coving, and ceilings.

Requirements

- All bare wood surfaces (doors, trim, counters, shelves, cabinets, etc.) must be painted or sealed.
- Floors must be constructed of smooth, easily cleanable, durable, and non-absorbent material.
- Coving must be installed at all wall/floor junctions.
- Walls must be constructed of smooth, easily cleanable, durable, and non-absorbent materials. Fiber reinforced plastic (FRP) or similar waterproof material is recommended on walls surfaces behind sinks and areas exposed to moisture.
- Ceilings must be constructed of smooth, easily cleanable, durable, and non-absorbent materials.
- All light fixtures must have light covers, sleeves and endcaps, or shatterproof light bulbs.

Sample finish schedule

	Floors	Coving	Walls	Ceiling	Counters

MOBILE UNIT QUESTIONS

1. Have you read the Mobile Unit Plan Review Packet documents?

Yes No

2. Will the mobile unit operate on a route? If yes, a sample route must be included in your application.

Yes No

3. Will you have more than one sales site? If yes, how many?

No Yes, _____

4. Have you included a Sales Site Agreement for each private sales site where you will operate for at least one hour?

Yes No

5. Will you provide seating? If yes, customers must be able to use the restroom.

Yes No

6. Is the mobile unit moveable?

Yes No

7. I understand the mobile unit must return to its approved commissary kitchen daily.

Yes No

8. Have you included a mobile unit floorplan and equipment list?

Yes No

9. Have you included a Commissary Kitchen Agreement if applicable?

Yes No

10. Have you included pictures of the mobile unit (exterior front, back, and sides and interior)?

Yes No

11. How will you display your menu? Check all that apply.

Menu display Sandwich board Paper menu

12. List all cold beverages and describe where they will be kept cold.

13. Will you serve any raw or undercooked food?

Yes No

14. List all raw meats cooked on the mobile unit and how they are prepared. Raw meat greater than one-inch thick must be cooked in a commissary kitchen.

15. Describe how you will serve condiments.

16. How many sets of utensils will you have?

17. Where will you wash utensils?

18. How often will you wash utensils?

19. Do your food preparation steps indicate which food you prepare in the mobile unit and which food you prepare in the commissary kitchen?

Yes No

20. Are all refrigerators and equipment (except freezers) commercial grade?

Yes No

21. Your mobile unit must have at least adequate refrigeration units. Are the refrigeration units installed?

Yes No

22. If you will make to order foods (e.g., sandwiches, tacos, hamburgers) with cold items (e.g., lettuce, tomato), a preparation table must be installed. Will you make food to order?

Yes No

23. During transport, all hot and cold holding equipment must run to maintain food temperature. How are hot and cold holding equipment powered during transit?

Truck engine or battery Propane Generator Other _____

24. What size is the handwash sink?

_____ long, by _____ wide, by _____ deep

25. Is a mixing faucet installed on the handwash sink?

Yes No

26. Are hot and cold water available at the handwash sink?

Yes No

27. What is the mechanical water pump's make and model number?

28. Can the mechanical water pump pressurize the hot and cold water systems?

Yes No

29. Handwash sink water must be available on demand, without needing to turn power on between washing. Does the water pump turn on and off automatically?

Yes No

30. The hot water heater must meet water capacity requirements. What is hot water heater's size, make and model number?

31. In gallons, what size is the freshwater tank?

32. Where and how will you fill the freshwater tank?

33. In gallons, what size is the wastewater tank?

34. Where and how will you empty the wastewater tank?

35. Where and how will you dispose of trash?

36. Where will you store refrigerated food each night?

37. Do you understand cooling is not allowed on mobile units?

Yes No

38. What will you do with leftover cooked food each night?

39. Where will you store the mobile unit overnight?

40. Will the mobile unit be connected to electricity overnight?

Yes No

41. Describe how you will ensure your unit will be cleaned and sanitized. Be sure to include your cleaning schedule. Cleaning schedules for some equipment (hood filters, refrigeration unit coils, hot water heater descaling) should follow the manufacturer's cleaning instructions.

42. What is your typical operating schedule? We know hours may vary depending on events you may attend/need to return to commissary kitchen or servicing area.

Sunday: _____ am/pm to _____ am/pm

Monday: _____ am/pm to _____ am/pm

Tuesday: _____ am/pm to _____ am/pm

Wednesday: _____ am/pm to _____ am/pm

Thursday: _____ am/pm to _____ am/pm

Friday: _____ am/pm to _____ am/pm

Saturday: _____ am/pm to _____ am/pm

43. Describe what you will do if you run out of potable water while operating.

44. Describe what you will do if your wastewater tank overflows while operating.

Questions 46-52 for Mobile Trucks or Trailers Only

45. Have you submitted a copy of your Washington State Labor and Industries approval? If you haven't yet received it, you must submit it when you apply for your Food Service Establishment Permit; a pre-opening inspection will not be performed until a copy is furnished.

Yes No

46. Is a 3-compartment sink installed on the truck or trailer?

Yes No

47. What size are the compartments of the three-compartment sink?

_____ long, by _____ wide, by _____ deep

48. Are drainboards attached to both ends of the 3-compartment sink?

Yes No

49. Are the compartments of the 3-compartment sink large enough to submerge and wash all equipment? If no, what equipment does not fit and how will it be washed?

Yes No, _____

50. Does the faucet reach to all compartments of the 3-compartment sink?

Yes No

51. Can you completely fill two compartments of the three-compartment sink with hot water (100°F) without the water temperature dropping below 100°F?

Yes No

Questions 53-58 for Mobile Carts Only

52. Is your menu limited to pre-cooked items?

Yes No

53. Have you submitted a diagram showing the cart's sneeze-guard?

Yes No

54. If sneeze-guard is vertical, is it at least 60 inches tall when measured from the ground?

Yes No

55. How do you transport the cart from the commissary kitchen to the sales site?

56. How do you keep the cart clean during transport?

57. How do you keep food and single-service items protected from contamination during transport?

SALES SITE AGREEMENT

Food Service Establishment Application

Submittal Date	Dates of Usage (1 year maximum)	
	From	To

By signing this agreement, the owner of the commissary facility certifies that the sales site meets all the standards of the Washington State Retail Food Code, [Chapter 246-215 Washington Administrative Code](#).

SALES SITE INFORMATION	
Name of sales site	Contact phone
Site address (city, state, zip)

PROPOSAL TO OPERATE WITHOUT A COMMISSARY KITCHEN

In some cases, a mobile unit may be self-contained and could operate without the use of a commissary kitchen. To be eligible, your mobile unit must include all equipment and fixtures aboard the unit which would normally be available in a commissary kitchen. In general, mobile units are not equipped with adequate freshwater capacity, wastewater capacity, food preparation space, indirectly drained food preparation sinks, or adequate refrigeration to accommodate all food preparation and food storage needs. If your proposal to operate without a commissary kitchen is accepted by the Health District, you will still be required to obtain potable water and to dispose of wastewater at an approved servicing area. Complete the following sections of the proposal to operate without a commissary kitchen. A mobile unit cannot serve as a commissary for other food businesses.

All equipment and fixtures typically available in a commissary kitchen must be included aboard your unit. Describe how you will or will not meet this requirement. If you will not meet this requirement, how will you bring the unit into compliance?

Describe how you will protect the mobile unit from contamination while it is not in use.

Describe how you will ensure required food temperatures will be maintained during storage, preparation, service, and transit.

Storage

Preparation

Service

Transit

Describe where and how your equipment will be stored when the unit is not in use.

Describe where and how your food will be stored when the unit is not in use.

Describe your warewashing plan. Be sure to include frequency of warewashing and how you calculated how much bigger your potable water tank must be to accommodate warewashing.

You will need an electrical power supply with adequate wattage to maintain TCS foods at proper temperatures.

Total wattage needed (from equipment list): _____ W

Wattage available: _____ W

If the wattage available is less than the wattage needed, describe how you address the difference.

Describe where you will get potable water from and how you will ensure the freshwater tanks are filled in a sanitary manner. If obtaining water from a commercial kitchen, submit a Commissary Kitchen Agreement.

Describe where you will dispose of wastewater and how you will ensure the wastewater tanks are emptied in a sanitary manner. If disposing of wastewater at a commercial kitchen, submit a Commissary Kitchen Agreement. If disposing at a site other than a commercial kitchen, submit a Wastewater Disposal Agreement.

Most food establishments generate some sort of liquid waste, such as used sanitizer solution, mop water, or unused beverage components (such as when making cocktail or espresso drinks). Describe where you will dispose of liquid waste.

Describe where cleaning equipment and chemicals will be stored.

If you will use ice, describe where it will be obtained.

N/A, we will not use any ice.

Describe where and how you will dispose of garbage generated on your unit.

Describe where and how your equipment will be stored when the unit is not in use.

WASTEWATER DISPOSAL AGREEMENT

Food Service Establishment Application

Submittal Date	Dates of Usage (1 year maximum)
	From _____ To _____

By signing this agreement, the owner of the wastewater disposal facility certifies that the facility meets all the standards of the Washington State Retail Food Code, [Chapter 246-215 Washington Administrative Code](#). Recreational vehicle (RV) dumps may not accept commercial food wastewater.

WASTEWATER FACILITY INFORMATION
