

Defensible Space Standards

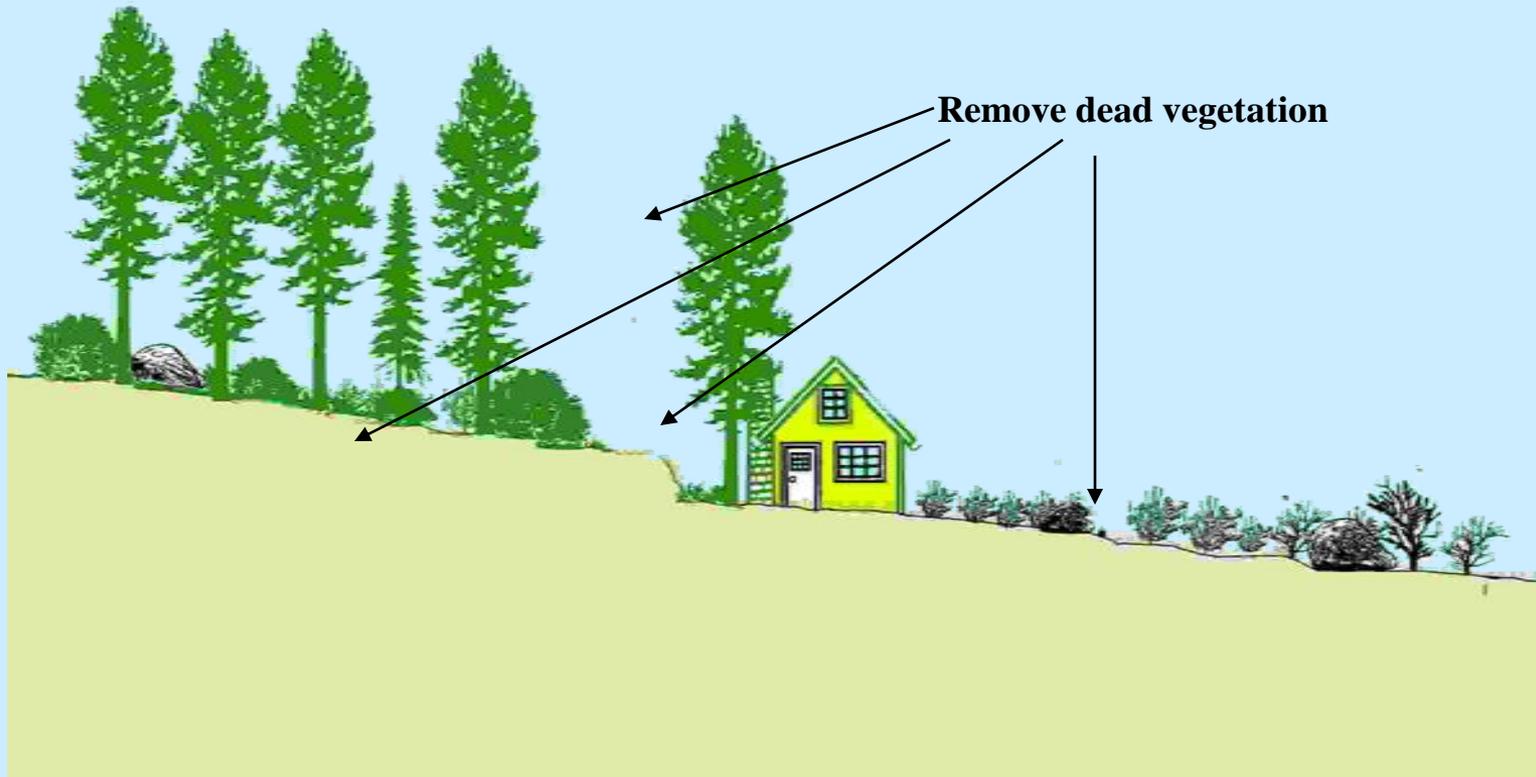

Evidence from past fires shows that a home has a fifty per cent greater chance of surviving a wildfire if the home has defensible space.

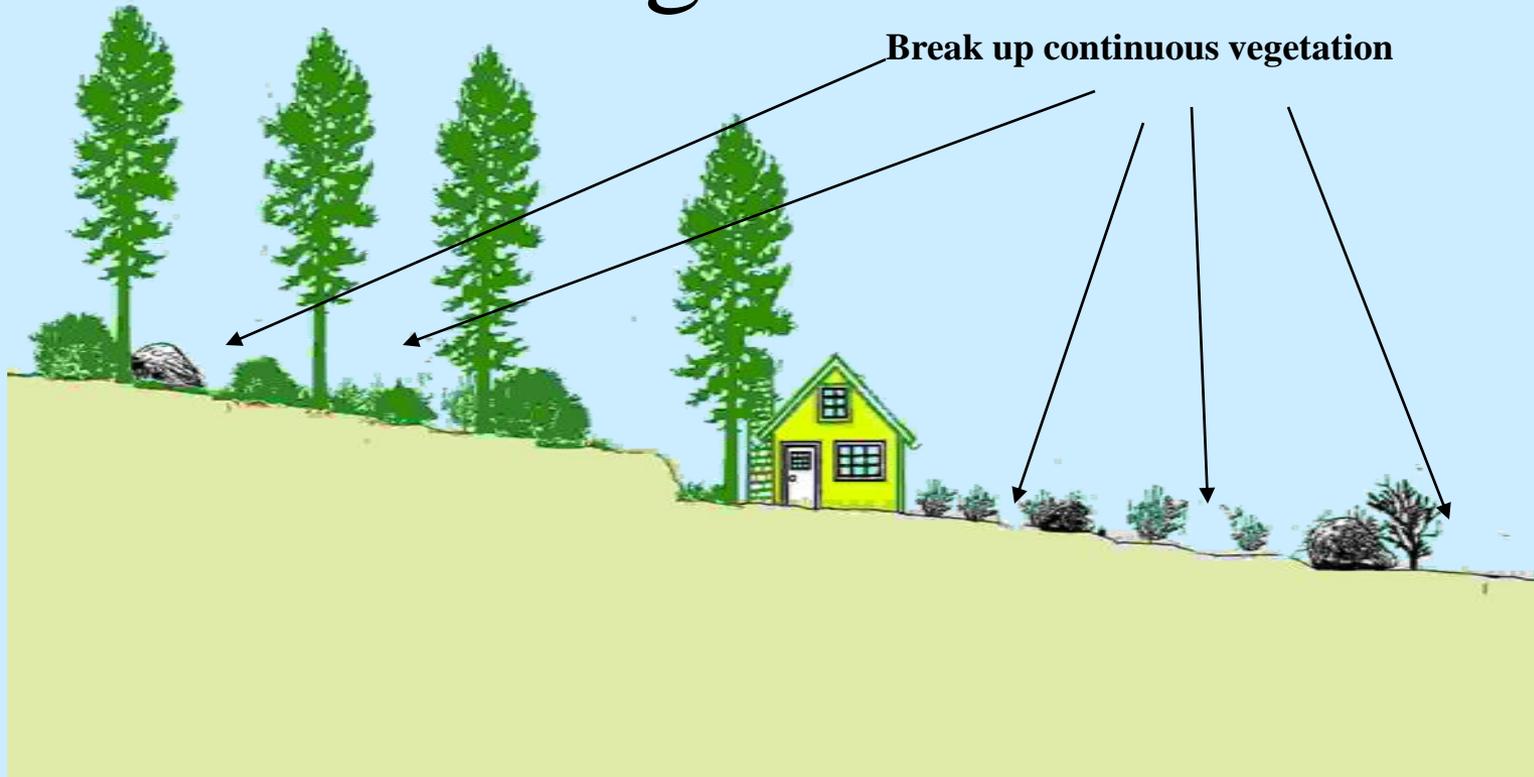

Step 1: Determine Recommended Defensible Space

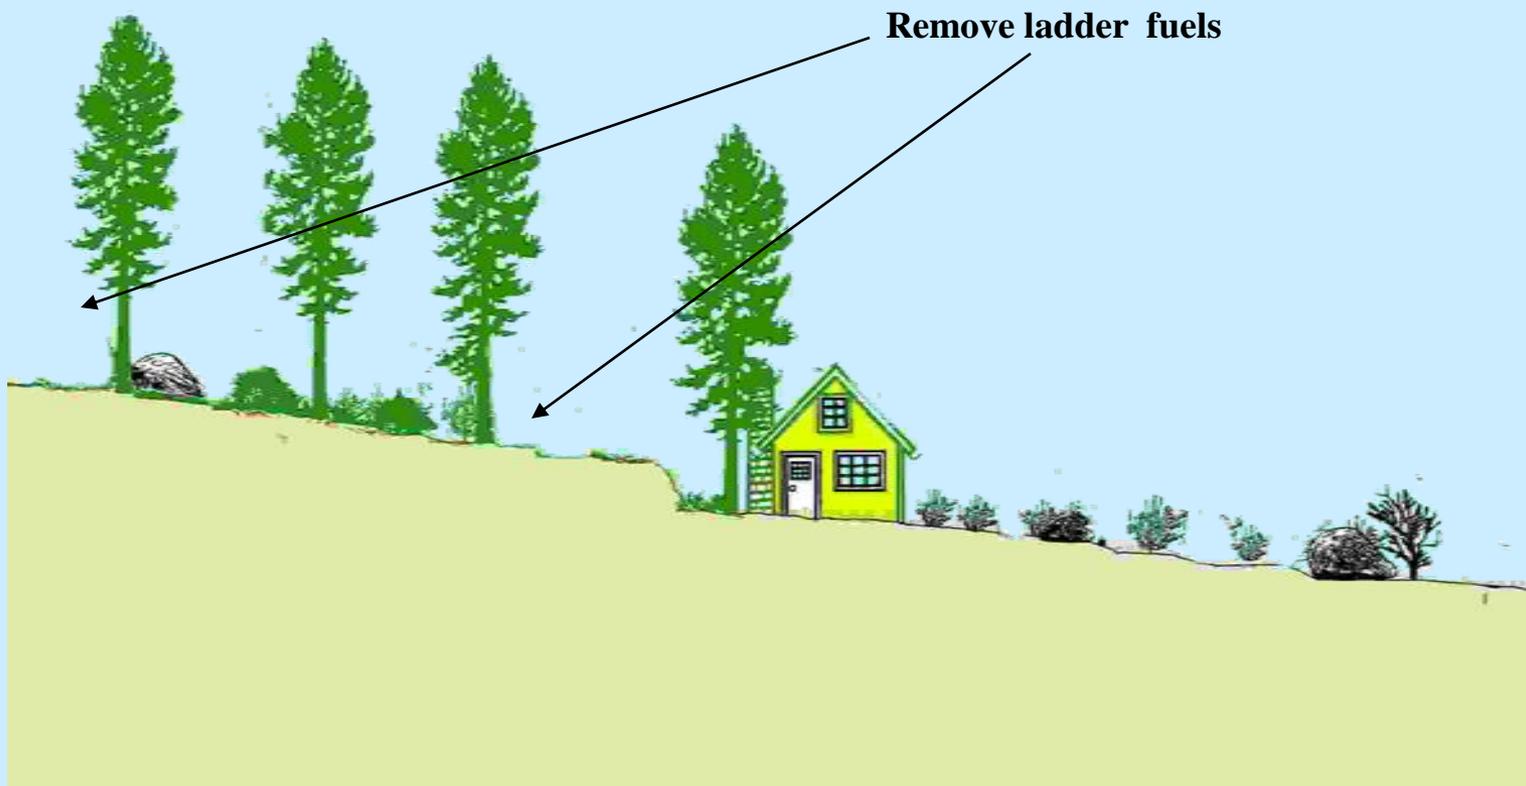

Step 2: Remove Dead Vegetation

Step 3: Break up Continuous Vegetation

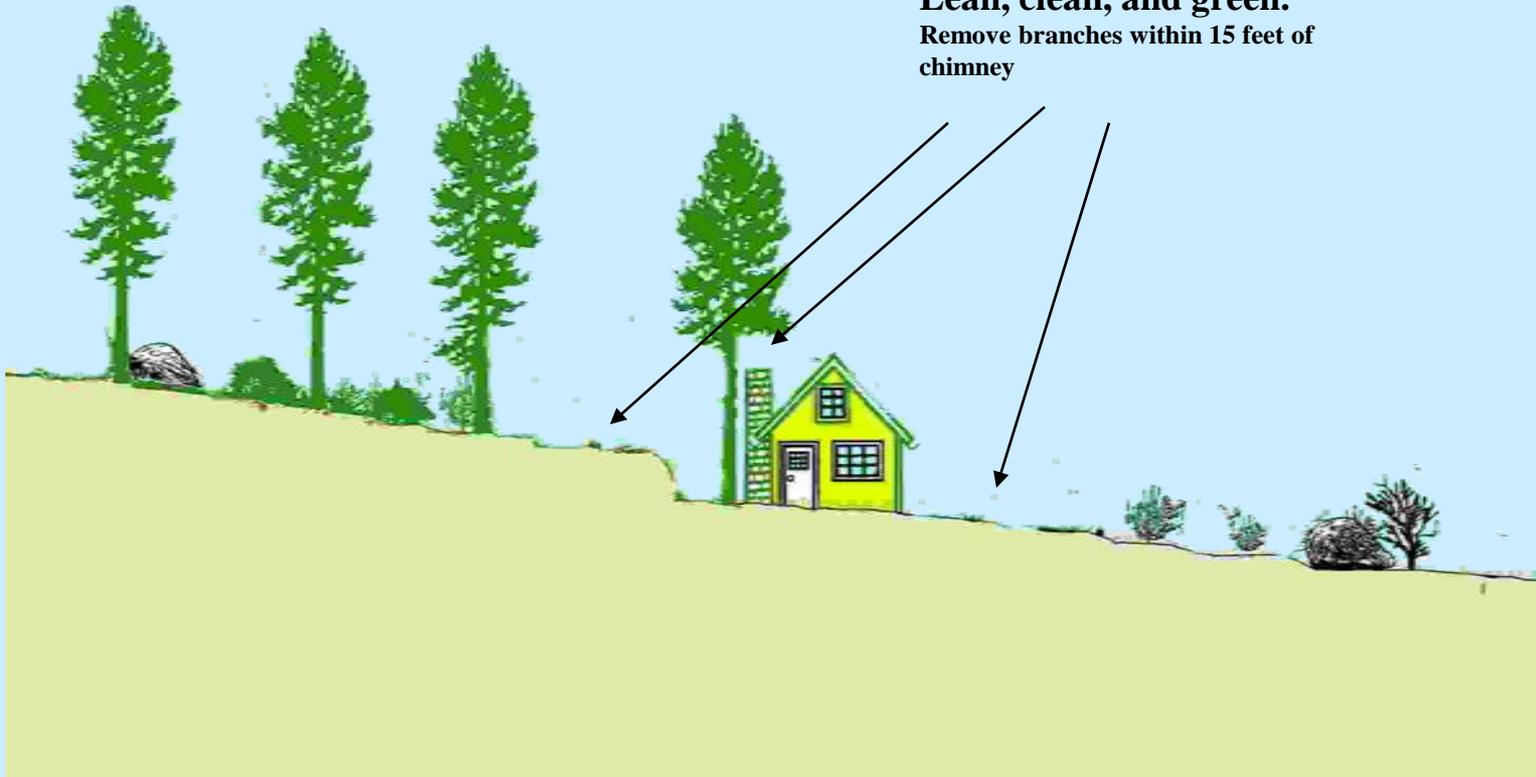

Step 4: Remove Ladder Fuels

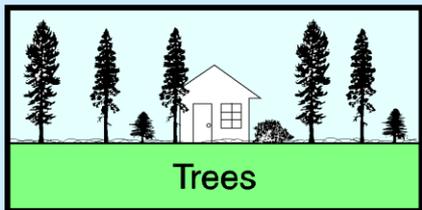

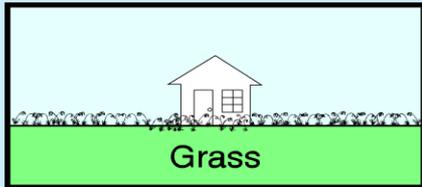

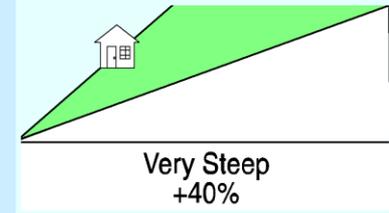

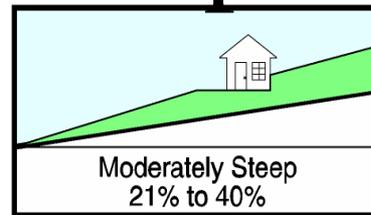

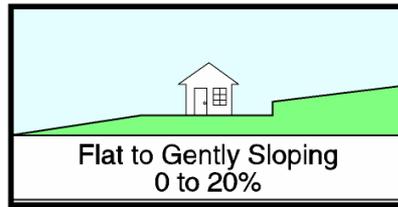

Step 5: Create Lean, Clean and Green Zone

Lean, clean, and green.
Remove branches within 15 feet of chimney

Determine Recommended Defensible Space

30 feet	100 feet	100 feet
100 feet	200 feet	200 feet
150 feet	150 feet	200 feet
