

## **Goal Statement**

### **Streamkeepers is:**

- A scientific organization providing monitoring and data-management assistance toward the protection and restoration of local watersheds.
- A volunteer opportunity for residents interested in Citizen Science and stewardship.

### **Program Goals**

- Provide credible data to decision-makers acting to protect and restore local watersheds:
  - Describe current watershed conditions
  - Identify trends in watershed conditions
  - Track known problem areas
  - Screen for potential problems
  - Help to determine watershed restoration priorities
  - Monitor the effectiveness of watershed restoration projects
- Report the information to a variety of audiences.
- Facilitate public involvement in Citizen Science and stewardship.
