

TABLE OF CONTENTS

1. BACKGROUND AND PURPOSE OF THE REPORT.....	1-1
1.1 <i>Report Organization.....</i>	<i>1-5</i>
2. POPULATION, LAND USE, AND SHORELINE DEVELOPMENT IN THE NORTH OLYMPIC COAST STUDY AREA	2-1
2.1 <i>Geographic Overview</i>	<i>2-1</i>
2.1.1 East Planning Region.....	2-1
2.1.2 Middle Planning Region	2-3
2.1.3 The West Planning Region	2-3
2.2 <i>Population.....</i>	<i>2-3</i>
2.3 <i>Existing Land Use and Zoning.....</i>	<i>2-4</i>
2.4 <i>Future Development Potential in SMP Jurisdiction</i>	<i>2-7</i>
2.4.1 Marine Shorelines	2-8
2.4.1 Freshwater Shorelines.....	2-8
3. STRAIT OF JUAN DE FUCA ECOSYSTEM: MARINE SHORELINES.....	3-1
3.1 <i>Overview of Marine Shoreline Ecosystem Processes</i>	<i>3-2</i>
3.1.1 Processes Affecting Marine Shorelines	3-2
3.1.2 Evaluation of Marine Nearshore Processes along the Strait of Juan de Fuca.....	3-9
3.2 <i>Establishing a Baseline to Measure and Track Marine Ecological Functions</i>	<i>3-12</i>
3.2.1 Baseline Conditions Overview	3-15
3.2.2 Potential Effects of Future Development and Baseline Conditions.....	3-32
3.3 <i>Summary of Baseline Conditions and Initial Management Considerations for the Strait of Juan de Fuca Marine Shore</i>	<i>3-35</i>
3.3.1 Key Management Considerations.....	3-36
4. MARINE REACH INVENTORY	4-1
4.1 <i>Reach 1: Diamond Point (Maps 1a to 6a in Appendix A).....</i>	<i>4-1</i>
4.1.1 Summary of Baseline Conditions	4-1
4.1.2 Future Land Use and Potential Effects on Shoreline Ecology.....	4-3
4.1.3 Management Issues and Opportunities	4-4
4.2 <i>Reach 2: Sequim Bay (Maps 1a to 6a in Appendix A).....</i>	<i>4-5</i>
4.2.1 Summary of Baseline Conditions	4-5
4.2.2 Future Land Use and Potential Effects on Shoreline Ecology.....	4-7
4.2.3 Management Issues and Opportunities	4-7
4.3 <i>Reach 3: Gibson Spit (Maps 1a to 6a in Appendix A).....</i>	<i>4-8</i>
4.3.1 Summary of Baseline Conditions	4-8
4.3.2 Future Land Use and Potential Effects on Shoreline Ecology.....	4-10
4.3.3 Management Issues and Opportunities	4-10
4.4 <i>Reach 4: Kulakala Point (Maps 1a to 6a in Appendix A).....</i>	<i>4-11</i>
4.4.1 Summary of Baseline Conditions	4-11
4.4.2 Future Land Use and Potential Effects on Shoreline Ecology.....	4-13
4.4.3 Management Issues and Opportunities	4-14

4.5 *Reach 5: Dungeness Spit (Maps 1a to 6a in Appendix A)*..... 4-14

 4.5.1 Summary of Baseline Conditions 4-14

 4.5.2 Future Land Use, Potential Effects on Shoreline Ecology, and Management Issues
 4-15

4.6 *Reach 6: Green Point (Maps 1a to 6a in Appendix A)*..... 4-16

 4.6.1 Summary of Baseline Conditions 4-16

 4.6.2 Future Land Use and Potential Effects on Shoreline Ecology..... 4-19

 4.6.3 Management Issues and Opportunities 4-19

4.7 *Reach 7: Angeles Point (Maps 1b to 6b in Appendix A)*..... 4-20

 4.7.1 Summary of Baseline Conditions 4-20

 4.7.2 Future Land Use and Potential Effects on Shoreline Ecology..... 4-22

 4.7.3 Management Issues and Opportunities 4-22

4.8 *Reach 8: Observatory Point (Maps 1b to 6b in Appendix A)*..... 4-23

 4.8.1 Summary of Baseline Conditions 4-23

 4.8.2 Future Land Use and Potential Effects on Shoreline Ecology..... 4-23

 4.8.3 Management Issues and Opportunities 4-24

4.9 *Reach 9: Crescent Bay-Low Point (Maps 1b to 6b in Appendix A)*..... 4-24

 4.9.1 Summary of Baseline Conditions 4-25

 4.9.2 Future Land Use and Potential Effects on Shoreline Ecology..... 4-26

 4.9.3 Management Issues and Opportunities 4-26

4.10 *Reach 10: Twin Rivers (Maps 1b to 6b in Appendix A)*..... 4-26

 4.10.1 Summary of Baseline Conditions 4-27

 4.10.2 Future Land Use and Potential Effects on Shoreline Ecology..... 4-28

 4.10.3 Management Issues and Opportunities 4-28

4.11 *Reach 11: Deep Creek (Maps 1c to 6c in Appendix A)*..... 4-29

 4.11.1 Summary of Baseline Conditions 4-29

 4.11.2 Future Land Use and Potential Effects on Shoreline Ecology..... 4-30

 4.11.3 Management Issues and Opportunities 4-30

4.12 *Reach 12: Pysht River (Maps 1c to 6c in Appendix A)*..... 4-30

 4.12.1 Summary of Baseline Conditions 4-30

 4.12.2 Future Land Use and Potential Effects on Shoreline Ecology..... 4-31

 4.12.3 Management Issues and Opportunities 4-31

4.13 *Reach 13: Pillar Point (Maps 1c to 6c in Appendix A)*..... 4-31

 4.13.1 Summary of Baseline Conditions 4-32

 4.13.2 Future Land Use and Potential Effects on Shoreline Ecology..... 4-32

 4.13.3 Management Issues and Opportunities 4-32

4.14 *Reach 14: Slip Point (Maps 1c to 6c in Appendix A)*..... 4-33

 4.14.1 Summary of Baseline Conditions 4-33

 4.14.2 Future Land Use and Potential Effects on Shoreline Ecology..... 4-33

 4.14.3 Management Issues and Opportunities 4-33

4.15 *Reach 15: Clallam Bay (Maps 1c to 6c in Appendix A)*..... 4-34

 4.15.1 Summary of Baseline Conditions 4-34

 4.15.2 Future Land Use and Potential Effects on Shoreline Ecology..... 4-35

 4.15.3 Management Issues and Opportunities 4-36

4.16 *Reach 16: Sekiu-Kydaka Point (Maps 1c to 6c in Appendix A)*..... 4-36

 4.16.1 Summary of Baseline Conditions 4-36

4.16.2 Future Land Use and Potential Effects on Shoreline Ecology..... 4-38

4.16.3 Management Issues and Opportunities 4-38

4.17 *Reach 17: Shipwreck Point (Maps 1c to 6c in Appendix A)*..... 4-39

4.17.1 Summary of Baseline Conditions 4-39

4.17.2 Future Land Use and Potential Effects on Shoreline Ecology..... 4-40

4.17.3 Management Issues and Opportunities 4-41

4.18 *Reach 18: Rasmussen (Bullman Creek) (Maps 1c to 6c in Appendix A)* 4-42

4.18.1 Summary of Baseline Conditions 4-42

4.18.2 Future Land Use and Potential Effects on Shoreline Ecology..... 4-43

4.18.3 Management Issues and Opportunities 4-44

5. NORTH OLYMPIC ECOSYSTEM: FRESHWATER SHORELINES..... 5-1

5.1 *Overview of Freshwater Shorelines Ecosystem Processes* 5-2

5.2 *Processes Affecting Freshwater Shorelines* 5-3

5.2.2 Evaluation of Freshwater Processes along the Strait of Juan de Fuca Tributaries ..5-10

5.3 *Establishing a Baseline to Measure and Track Freshwater Ecological Functions* 5-11

5.4 *General Management Considerations for Freshwater Shorelines* 5-19

6. FRESHWATER REACH SUMMARY..... 6-1

6.1 *Little Quilcene River (Maps 1a to 6a in Appendix A)*..... 6-1

6.2 *Dungeness River and Tributaries (Maps 1a to 6a in Appendix A)*..... 6-1

6.2.1 Summary of Baseline Conditions 6-2

6.2.2 Future Land Use and Potential Effects on Shoreline Ecology..... 6-5

6.2.3 Management Issues and Opportunities 6-5

6.3 *McDonald Creek (Maps 1a to 6a in Appendix A)*..... 6-6

6.3.1 Summary of Baseline Conditions 6-6

6.3.2 Future Land Use and Potential Effects on Shoreline Ecology..... 6-7

6.3.3 Management Issues and Opportunities 6-7

6.4 *Morse Creek (Maps 1a to 6a in Appendix A)*..... 6-8

6.4.1 Summary of Baseline Conditions 6-8

6.4.2 Future Land Use and Potential Effects on Shoreline Ecology..... 6-10

6.4.3 Management Issues and Opportunities 6-11

6.5 *Elwha River (Maps 1b to 6b in Appendix A)*..... 6-11

6.5.1 Summary of Baseline Conditions 6-11

6.5.2 Future Land Use and Potential Effects on Shoreline Ecology..... 6-13

6.5.3 Management Issues and Opportunities 6-13

6.6 *Little River (Maps 1b to 6b in Appendix A)* 6-14

6.6.1 Summary of Baseline Conditions 6-14

6.6.2 Future Land Use and Potential Effects on Shoreline Ecology..... 6-15

6.6.3 Management Issues and Opportunities 6-15

6.7 *Lake Sutherland and Indian Creek (Maps 1b to 6b in Appendix A)*..... 6-15

6.7.1 Summary of Baseline Conditions 6-15

6.7.2 Future Land Use and Potential Effects on Shoreline Ecology..... 6-17

6.7.3 Management Issues and Opportunities 6-17

6.8 *Salt Creek (Maps 1b to 6b in Appendix A)*..... 6-18

6.8.1	Summary of Baseline Conditions	6-18
6.8.2	Future Land Use and Potential Effects on Shoreline Ecology.....	6-19
6.8.3	Management Issues and Opportunities	6-19
6.9	<i>Lyre River and Boundary Creek (Maps 1b to 6b in Appendix A)</i>	6-20
6.9.1	Summary of Baseline Conditions	6-20
6.9.2	Future Land Use and Potential Effects on Shoreline Ecology.....	6-21
6.9.3	Management Issues and Opportunities	6-21
6.10	<i>East Twin River (Maps 1b to 6b in Appendix A)</i>	6-21
6.10.1	Summary of Baseline Conditions	6-21
6.10.2	Future Land Use and Potential Effects on Shoreline Ecology.....	6-22
6.10.3	Management Issues and Opportunities	6-22
6.11	<i>West Twin River (Maps 1b to 6b in Appendix A)</i>	6-22
6.11.1	Summary of Baseline Conditions	6-23
6.11.2	Future Land Use and Potential Effects on Shoreline Ecology.....	6-23
6.11.3	Management Issues and Restoration Opportunities.....	6-23
6.12	<i>Deep Creek (Maps 1c to 6c in Appendix A)</i>	6-23
6.12.1	Summary of Baseline Conditions	6-24
6.12.2	Future Land Use and Potential Effects on Shoreline Ecology.....	6-24
6.12.3	Management Issues and Opportunities	6-25
6.13	<i>Pysht River and Tributaries (Maps 1c to 6c in Appendix A)</i>	6-25
6.13.1	Summary of Baseline Conditions	6-25
6.13.2	Future Land Use and Potential Effects on Shoreline Ecology.....	6-27
6.13.3	Management Issues and Opportunities	6-27
6.14	<i>Clallam River (Maps 1c to 6c in Appendix A)</i>	6-28
6.14.1	Summary of Baseline Conditions	6-28
6.14.2	Future Land Use and Potential Effects on Shoreline Ecology.....	6-29
6.14.3	Management Issues and Opportunities	6-29
6.15	<i>Hoko River (Maps 1c to 6c in Appendix A)</i>	6-30
6.15.1	Summary of Baseline Conditions	6-30
6.15.2	Future Land Use and Potential Effects on Shoreline Ecology.....	6-32
6.15.3	Management Issues and Opportunities	6-32
6.16	<i>Sekiu River (Maps 1c to 6c in Appendix A)</i>	6-32
6.16.1	Summary of Baseline Conditions	6-33
6.16.2	Future Land Use and Potential Effects on Shoreline Ecology.....	6-34
6.16.3	Management Issues and Opportunities	6-34
6.17	<i>Bullman Creek (Maps 1c to 6c in Appendix A)</i>	6-35
6.17.1	Summary of Baseline Conditions	6-35
6.17.2	Future Land Use and Potential Effects on Shoreline Ecology.....	6-35
6.17.3	Management Issues and Opportunities	6-35
7.	REGULATORY PROGRAMS THAT COMPLEMENT THE SHORELINE MASTER PROGRAM	7-1
7.1	<i>Local Regulations and Plans</i>	7-1
7.1.1	Comprehensive Plan and Zoning (CCC Title 31 and 33).....	7-1
7.1.2	Critical Areas Regulations (CCC 27.12)	7-1
7.1.3	Other Provisions of Clallam County Code	7-2
7.1.4	Water Resources Inventory Area (WRIA) Plans	7-2

7.1.5	Other Shoreline Master Programs.....	7-3
7.2	<i>State and Federal Regulations and Plans</i>	7-3
7.2.1	Clean Water Act (CWA):.....	7-3
7.2.2	Rivers and Harbors Act Section 10:.....	7-4
7.2.3	Endangered Species Act	7-4
7.2.4	State Hydraulic Code	7-4
7.2.5	Forest Practices Act	7-4
7.2.6	Aquatic Land Leasing.....	7-5
8.	REFERENCES	8-1
9.	ABBREVIATIONS AND GLOSSARY	9-1
9.1	<i>Abbreviations</i>	9-1
9.2	<i>Glossary</i>	9-3
	APPENDIX A: SHORELINE INVENTORY MAP FOLIO	A-1
	APPENDIX B: CHANNEL MIGRATION ZONE MAP FOLIO	B-1

LIST OF TABLES

Table 1-1.	Clallam County Shoreline Inventory Map Themes and Numbers	1-7
Table 2-1.	Clallam County Population Growth by Region.....	2-4
Table 2-2.	Potentially Developable Lands within SMP Jurisdiction along the Marine Shoreline (excluding WRIA 20)	2-8
Table 2-3.	Potentially Developable Lands within SMP Jurisdiction along Freshwater Shorelines (excluding WRIA 20)	2-9
Table 3-1.	Priority wildlife species mapped along the Clallam County, Strait of Juan de Fuca shorelines (Sources: WDFW, WDNR).....	3-1
Table 3-2.	Relative sea level rise projections for major geographic areas of Washington State (Huppert et al. 2010, adapted from Mote et al. 2008).....	3-8
Table 3-3.	Suggested indicators of marine shoreline ecological function that can be systematically tallied using existing data for Clallam County.....	3-14
Table 3-4.	Breakdown of shoreform categories on the Strait of Juan de Fuca shoreline in Clallam County as a percent of shoreline length (Source: PSNERP 2009)	3-16
Table 3-5.	Strait of Juan de Fuca shoretype mapping and criteria for Clallam County (CGS 2011)	3-17
Table 3-6.	Strait of Juan de Fuca shoretype mapping and criteria for Clallam County (CGS 2011)	3-21
Table 3-7.	Percent of each reach mapped as feeder bluff along the Strait of Juan de Fuca in Clallam County (data from CGS 2011)	3-21
Table 3-8.	Percent of each reach mapped as landslide and erosion hazard along the Strait of Juan de Fuca in Clallam County (data from WDNR 2007)	3-22
Table 3-9.	Reaches where armoring occurs at the base of mapped feeder bluffs along the Strait of Juan de Fuca in Clallam County	3-24
Table 3-10.	Effects of hard armoring on some marine species (from Thom et al. 1994).....	3-25

Table 3-11. Reaches where overwater structures occur within sediment transport zones along the Strait of Juan de Fuca in Clallam County (data from PSNERP 2009 and CGS 2011)..... 3-27

Table 3-12. Kelp abundance per mile of reach along the Strait of Juan de Fuca in Clallam County (data from WDNR 2004) 3-28

Table 3-13. Developable Lands (Vacant Parcels) that have Closed Canopy Forest along the Strait of Juan de Fuca in Clallam County 3-32

Table 3-14. Length and Percent of Developable Lands (Vacant Parcels) that also have Feeder Bluffs along the Strait of Juan de Fuca in Clallam County 3-34

Table 3-15. Length and Percent of Developable Lands (Vacant Parcels) in areas that provide suitable forage fish spawning habitat along the Strait of Juan de Fuca in Clallam County 3-35

Table 5-1. Priority wildlife species mapped along Clallam County freshwater shorelines (Sources: WDFW, WDNR) 5-1

Table 5-2. Clallam County streams with mapped channel migration zones..... 5-9

Table 5-3. Suggested indicators of freshwater ecological function that can be systematically tallied using existing data for Clallam County 5-12

Table 5-4. Summary of salmon stock status for North Olympic Coast rivers in Clallam County (from NOPL 2005, adapted to correspond to SMP study area) 5-13

Table 5-5. Acres of closed canopy forest within 200 feet of the ordinary high water line (Data from Point No Point Treaty Council 2011)..... 5-15

Table 5-6. Acres and Number of Revetments and Levees on SMP streams in WRIA 17, 18 and 19 streams in Clallam County by reach (no systematic data available; estimates are from Clallam County staff and local experts)..... 5-17

Table 5-7. Impervious surface area as a percent of the shoreland jurisdictional area for streams in WRIA 17, 18 and 19 streams in Clallam County by reach (From National Land Cover Data Set) 5-18

Table 6-1. Regulatory Status of Dungeness Salmonids, 2011 6-3

LIST OF FIGURES

Figure 1-1. Steps in the shoreline master program update process; the public will have opportunities to review and comment on each of the technical products shown here..... 1-2

Figure 1-2. Clallam County Shorelines of the State in WRIsAs 17, 18 and 19 (purple outline shows the areas covered by this report) 1-4

Figure 2-1. East, Middle and West planning regions in Clallam County 2-2

Figure 2-2. Existing land use as a percent of the marine shoreland area..... 2-5

Figure 2-3. Existing land use as a percent of the freshwater shoreland area 2-5

Figure 2-4. Percent of the marine shoreland area in each zoning category 2-6

Figure 2-5. Percent of the freshwater shoreland area in each zoning category 2-7

Figure 3-1. Erosion at base of bluff contributing sand, cobble and gravel to the nearshore (Photo by A. MacLennan) 3-3

Figure 3-2. Evidence of recent landslide activity near Shipwreck Point (Photo by A. MacLennan) 3-4

Figure 3-3. Bluff erosion, landslides and littoral drift (Source: King County)..... 3-5

Figure 3-4. Bluff erosion threatening homes along Cypress Circle, west of Dungeness Spit (Source: Randy Johnson) 3-6

Figure 3-5. Relative degradation of Strait of Juan de Fuca nearshore reaches in terms of nearshore processes (Schlenger et al. 2010) 3-11

Figure 3-6. Relationship between human actions and shoreline ecological functions in the context of shoreline master programs 3-12

Figure 3-7. Relationship between shoreline stabilization regulations and forage fish functions .. 3-12

Figure 3-8. Inventory reaches along the Strait of Juan de Fuca numbered from east to west (MR= marine reach) 3-15

Figure 3-9. Percent of each reach with hard armoring along the Strait of Juan de Fuca in Clallam County (data from point PSNERP 2009, Battelle 2008) 3-24

Figure 3-10. Number of overwater structures per mile of reach along the Strait of Juan de Fuca in Clallam County (data from PSNERP 2009) 3-26

Figure 3-11. Kelp on Bullman Beach (Photo by A. MacLennan) 3-29

Figure 3-12. Illustration of the importance of eelgrass meadows as microhabitat for numerous species (from Port Townsend Marine Science Center; used with permission) 3-30

Figure 3-13. Healthy stands of marine riparian vegetation, such as this area just east of Green Point, perform important functions related to wildlife habitat, water quality, slope stability and food web support (photo: Ecology) 3-31

Figure 3-14. Percent of each marine reach with closed canopy forest cover along the Strait of Juan de Fuca in Clallam County (data from Point No Point Treaty Council 2011) 3-32

Figure 4-1. Forage fish eggs on gravelly beach substrate..... 4-2

Figure 4-2. View of the partial tidal barrier within Washington Harbor; the road/ dike contains a sewer outfall pipe..... 4-9

Figure 4-3. Segment of exceptional feeder bluff west of Dungeness Spit lacking native riparian forest cover. Note proximity of existing homes to edge of retreating bluffs (Photo: Ecology Coastal Atlas)..... 4-17

Figure 4-4. Development at the mouth of Morse Creek with the mapped floodplain and channel migration zone. (Photo: Ecology Coastal Atlas)..... 4-18

Figure 4-5. Common loon, one of several priority species to occur in Freshwater Bay 4-21

Figure 4-6. Surfer at Salt Creek Recreation Area, Crescent Beach 4-24

Figure 4-7. Retailed fill (“mole”) extending into the nearshore zone just west of West Twin River..... 4-27

Figure 4-8. Clallam Bay shoreline showing overwater structures (shown in red) and kelp stands (shown in green on right photo) (Photo: Ecology Coastal Atlas)..... 4-35

Figure 4-9. Mussels and other fauna on the rocky beach west of Sekiu Point 4-37

Figure 4-10. Riprap or” hard” shoreline armor and homes on the beach near the Hoko River (Photo by A. MacLennan..... 4-41

Figure 4-11. Pocket of residential development at Bullman Beach (Photo: Ecology Coastal Atlas) 4-43

Figure 5-1. Freshwater shorelines of the North Olympic Coast in Clallam County..... 5-2

Figure 5-2. Soil permeability in Clallam County (from the Draft Comprehensive Stormwater Management Plan, 2011) 5-4

Figure 5-3. Pacific salmon need healthy rivers for spawning, rearing and migration 5-5

Figure 5-4. Large woody debris “recruited” from adjacent riparian forest (Photo: Dungeness River Audubon Center)..... 5-7

Figure 5-5a-d. Channel migration areas are potentially hazardous areas and development within these areas should be avoided to reduce safety risk and prevent ecological impacts (From the Dungeness Flood Hazard Management Plan; sketches by Amanda Kingsley, used with permission)..... 5-8

Figure 5-6. Dungeness River channel migration event (Photo: Randy Johnson)..... 5-9

Figure 5-7. • Ecology’s relative ranking of the water flow processes for each sub basin draining to the Strait of Juan de Fuca 5-10

Figure 5-8. Relationship between vegetation retention regulations and salmon production in freshwater rivers and streams..... 5-11
