

DRAFT

About the Map

Shoreline Environmental Designations provide a framework for SMP policies and regulations based on their characteristics. The SMP applies to streams (or segments thereof) with a mean annual flow of 20 cfs, lakes greater than 20 acres, and marine waters; together with their underlying lands and associated shorelands. The mapped jurisdictional extent is based on the approximate location of areas within 200 feet of the ordinary high water mark (OHWM) and floodway, 100-year floodplain, and associated wetlands. The full jurisdictional extent also includes critical areas and protective buffers overlapping shorelands. The County SMP does not apply within the Olympic National Park, cities, or lands held in trust by the U.S. for Indian Tribes. The actual physical location of SMP jurisdiction requires professional judgment and site specific information.

**DRAFT - CLALLAM COUNTY SHORELINE MASTER PROGRAM (SMP)
Shoreline Environmental Designations (SED) Map**

| | | | |
|---------------------------------------|------------------------------|-------------------------|-------------------------|
| Natural SED | Feeder Bluff - Exceptional | Associated Wetlands | Parcel Boundaries |
| Resource Conservancy SED | Feeder Bluff - Other | Cities | Urban Growth Area |
| Shoreline Residential-Conservancy SED | Other Unstable Bluff | Tribal Land | 1000 cfs USGS point |
| Shoreline Residential-Intensive SED | Channel Migration Zone (CMZ) | State and County Parks | Non-SMP Stream |
| Marine Waterfront SED | High Potential CMZ | Olympic National Park | Olympic Discovery Trail |
| Aquatic (includes marine waters) SED | Low Potential CMZ | Olympic National Forest | Highways and Roads |
