

About the Map

Shoreline Environmental Designations provide a framework for SMP policies and regulations based on their characteristics. The SMP applies to streams (or segments thereof) with a mean annual flow of 20 cfs, lakes greater than 20 acres, and marine waters; together with their underlying lands and associated shorelands. The mapped jurisdictional extent is based on the approximate location of areas within 200 feet of the ordinary high water mark (OHWM) and floodway, 100-year floodplain, and associated wetlands. The full jurisdictional extent also includes critical areas and protective buffers overlapping shorelands. The County SMP does not apply within the Olympic National Park, cities, or lands held in trust by the U.S. for Indian Tribes. The actual physical location of SMP jurisdiction requires professional judgment and site specific information.

**DRAFT - CLALLAM COUNTY SHORELINE MASTER PROGRAM (SMP)
Shoreline Environmental Designations (SED) Map**

Natural SED	Feeder Bluff - Exceptional	Associated Wetlands	Parcel Boundaries
Resource Conservancy SED	Feeder Bluff - Other	Cities	Urban Growth Area
Shoreline Residential-Conservancy SED	Other Unstable Bluff	Tribal Land	20 cfs USGS point
Shoreline Residential-Intensive SED	Channel Migration Zone (CMZ)	State and County Parks	1000 cfs USGS point
Marine Waterfront SED	High Potential CMZ	Olympic National Park	Non-SMP Stream
Aquatic (includes marine waters) SED	Low Potential CMZ	Olympic National Forest	Olympic Discovery Trail
		Highways and Roads
