Address Grid Boundary

Port Angeles Address Grid Boundary

The address grid boundary begins on the west approximately following the line between sections 35 and 36 south to the straight portion of Lower Elwha Road. It follows Lower Elwha Road (exclusive) to Edgewood Drive (inclusive) to Dry Creek Road (inclusive) to SR 101 (inclusive) to Valley Creek. It follows up Valley Creek to State forest land in the Foothills and generally follows along the drainage divide and then down Ennis Creek to SR 101. It follows SR 101 (inclusive) to the top of the Morse Creek bluff, then along Masters Road (inclusive) and the line between sections 7 and 8 to the Strait.

Lower Elwha Road addresses will use the rural (Clallam County) system. Addresses on all other roads acting as address grid boundaries will use the City system. Any rural system addresses on Edgewood Drive west of Lower Elwha Road will use a false origin based on the last "city block" addressed on the grid. Hurricane Ridge Road has no addresses within the grid, and will use the Rural System for it's entire length
